

Dvara E-Registry works with Farmer Producer Organisations and their member farmers in rural India. Through Doordrishti, FPOs and farmers gain access to multiple services like plot digitisation, crop analytics and advisory that enhance their crop productivity and reduces their cost of cultivation, give them access to loans and insurance and provide market linkages that help in selling their produce at a profitable price.

Dvara E-Registry provides farm-specific current and historical data in the form of refined analytics that helps businesses make informed decisions.

“Through our FPC, farmers receive better inputs, access credit easily, and learn improved methods. Seeing these real benefits has built trust and encouraged more farmers, especially women, to join us.”

Dvara E-Registry was born from the desire to see agriculture as a viable and sustainable business venture. Leveraging the power of technology and data analytics, with a goal to increase farm productivity and increased access to agricultural credit for smallholder farmers, we developed Doordrishti, a 360-degree platform.
